MAXDATA PLATINUM 220 Select

New Standards in the Entry-Level Server Segment

The MAXDATA PLATINUM 220 sets new standards in the entry-level server segment in flexibility, performance, and availability, and does so at an especially reasonable price.

The MAXDATA PLATINUM 220 is a server that can be converted from a tower to a rack server with five built-in units on demand. With its Intel® Pentium® 4 Processor with Hyper Threading Technology and a maximum expandability of the working memory to 4 GB, this server easily fulfills the performance demands of small and mid-sized businesses. This system is optionally available as S-ATA or SCSI and can be configured with up to 4 corresponding hot-plug hard drives and various RAID levels (0, 1, 5, 10).

For companies with up to 75 workstations, MAXDATA offers the PLATINUM 220 optionally with pre-installed Windows® Small Business Server 2003. In addition to the server operating system Windows® Server 2003 Standard Edition, this package includes other components, such as Microsoft® Exchange Server 2003, Microsoft® Outlook® 2003, and Microsoft® Windows® SharePoint™ Services.

Highlights:

- SCSI or S-ATA hot-plug hard drives
- Tower case or rack-mount
- S-ATA RAID 0, 1 on-board, only under Windows®
- Intel® LANDesk™ Client Manager

Application areas:

- File-/Print server
- Mail server for smaller companies
- Internet gateway
